Sweet Wheat

Many customers ask after having a shot of fresh wheat grass juice at our juice bar, "short of coming here every-day, how can I get these benefits at home?" well, you can't unless you juice it at home, but you can do about 95% as good by using Sweet Wheat. Not a wheat grass powder made from ground up wheat grass, Sweet Wheat is actual juiced wheat grass sprayed into a flake and then freeze-dried. This locks in the nutrients until added to water. It tastes great and the effect is outstanding.
