Need a Boost?

Vitrix (standardized tribulus) is quite possibly one of the best natural ways to give the man in your life a boost. By going to the same receptors that HCG (human gonada tropin) goes to, the body safely has access to more of the testosterone naturally made in the body. Taken daily in low doses provides a consistent boost to energy, libido, and endurance. Therapeutic doses may be taken pre-intercourse for a stronger effect. This product is the real thing. I had my levels tested after 8 days and found a significant increase in free testosterone

Fabulous Fiber

Just a quick reminder about how important fiber is in your diet. It helps with blood sugar, high cholesterol, and bowel tone. I am always amazed at how effective the results are when taken regularly. We offer great fiber supplements like 4 fiber, PGX, psyllium husks, and fiber yeast. Please remember to add water to compensate for the extra bulk and enjoy the benefits.

Alpha Lipoic Acid

We all know that R-Lipoic Acid is the natural non-synthetic form of Alpha Lipoic Acid. We just wanted to be sure that everyone knew all of the great benefits of taking it.

For starters, it is a low-level stressor which activates basic cellular defense mechanisms, including those naturally declining with age. It also tends to restore levels of Glutathione, a protective antioxidant and detoxification compound. There is also a strong anti-inflammatory agent which has a component to most age-related chronic degenerative disease and can restore cellular signaling process responsible for vasodilation, which declines in blood vessels with age. R-Lipoic acid also may reduce mitochondrial decay which is closely linked to the symptoms of aging and can protect cell membranes by boosting and recycling vitamins C, E, and CoQ10.
